CONTENTS OF VOLUME XXXIV

NO. 1. JANUARY 1971

Effect of prior activity on properties of different types of motor units. C. B. Olson and C. P. Swett, Jr. 1
Action of climbing fibers in cerebellar cortex of the cat. J. R. Bloedel and W. J. Roberts .. 17
Difference in effects on end-plate potentials between procaine and lidocaine as revealed by voltage-clamp experiments. T. Maeno, C. Edwards, and S. Hashimura 32
Single-unit responses to moving visual stimuli in middle suprasylvian gyrus of the cat. B. M. Dow and R. Dubner 47
Conversion of synaptic excitation to inhibition at a dual chemical synapse. H. Wachtel and E. R. Kandel 56
Analysis of parallel excitatory and inhibitory synaptic channels. M. V. L. Bennett 69
Ionic mechanisms of excitatory, inhibitory, and dual synaptic actions mediated by an identified interneuron in abdominal ganglion of *Aplysia*. J. E. Blankenship, H. Wachtel, and E. R. Kandel 76
Choline acetyltransferase in identified neurons of abdominal ganglion of *Aplysia californica*. E. Giller, Jr. and J. H. Schwartz 93
Acetylcholinesterase in identified neurons of abdominal ganglion of *Aplysia californica*. E. Giller, Jr. and J. H. Schwartz 108
Dynamic properties of mechanoreceptors with unmyelinated (C) fibers. P Bessou, P. R. Burgess, E. R. Perl, and C. B. Taylor 116
Contraction of muscle fibers in two adjacent muscles innervated by branches of the same motor axon. F. Emonet-Dénand, Y. Laporte, and U. Proske 132
Receptive-field characteristics of lateral geniculate neurons in the rabbit. D. L. Stewart, K. L. Chow, and R. H. Masland 139
Receptive-field characteristics of superior colliculus neurons in the rabbit. R. H. Masland, K. L. Chow, and D. L. Stewart 148
Matching of excitatory and inhibitory inputs to crustacean muscle fibers. H. L. Atwood and G. D. Bittner 157
Terminals of single Ia fibers: location, density, and distribution within a pool of 300 homonymous motoneurons. L. M. Mendell and E. Henneman 171
Announcement 188

NO. 2. MARCH 1971

Respiratory synchronizing function of nucleus parabrachialis medialis: pneumotaxic mechanisms. F. Bertrand and A. Hugelin 189
Olfactory coding in olfactory bulb and medial forebrain bundle of normal and castrated male rats. D. W. Pfaff and E. Gregory 208
Inhibitory resetting of resting discharge of fusimotor neurons. S. J. Fidone and J. B. Preston 217
Adaptation in a vertebrate retina: intracellular recording in *Necturus*. F. S. Werblin 228
Excitation and inhibition of Renshaw cells by impulses in peripheral afferent nerve fibers. R. W. Ryall and M. F. Piercey 242
Tonic vibration reflex in the cat. J. D. Gillies, D. J. Burke, and J. W. Lance 252
Unit activity during self-stimulation behavior. M. Ito and J. Olds 263
Functional significance of motoneuron size and soma position in swimmeret system of the lobster. W. J. Davis 274
Prejunctional effect of curare: its relative importance. A. Galindo 289
Supraspinal control of tonic vibration reflex. J. D. Gillies, D. J. Burke, and J. W. Lance .. 302
Intersegmental coordination of swimmeret motoneuron activity in crayfish. P. S. G. Stein .. 310
Announcements 319

NO. 3. MAY 1971

Plasticity of firing patterns in neurons of *Aplysia* pleural ganglion. W. B. KRISTAN, JR. 321
Prefrontal cortical unit activity and delayed alternation performance in monkeys. K. KUBOTA AND H. NIKI 337
Electrogenesis of cerebellar Purkinje cell responses in cats. F. E. MARTINEZ, W. E. CRILL, AND T. T. KENNEDY 348
Avian retina. I. Microelectrode depth and marking studies of local ERG. T. E. OGDEN AND R. M. WYLIE 357
Avian retina. II. An evaluation of retinal electrical anisotropy. T. E. OGDEN AND H. ITO .. 367
Occlusive behavior of negative-wave direct cortical response (DCR) and single cells in the cortex. J. W. PHILLIS AND S. OCHS 374
Control of unitary activities in cerebellothalamic pathway during wakefulness and synchronized sleep. M. STERIADE, V. APOSTOL, AND G. OAKSON 389
Activity of pallidal neurons during movement. M. R. DELONG 414
Baboon flexor and extensor fusimotor neurons and their modulation by motor cortex. P. GRIGG AND J. B. PRESTON 428
Cortical visual areas in the grey squirrel (*Sciurus carolinesis*): a correlation between cortical evoked potential maps and architectonic subdivisions. W. C. HALL, J. H. KAAS, H. KILLACKEY, AND I. T. DIAMOND 437
Nasotemporal overlap in visual field projected to lateral geniculate nucleus in the cat. K. J. SANDERSON AND S. M. SHERMAN 453
Phase-locking in response of single neurons in cochlear nuclear complex of the cat to low-frequency tonal stimuli. R. A. LAVINE 467
Announcements 484

NO. 4. JULY 1971

Peripheral versus central adaptation in the crustacean visual system. R. M. GLANTZ 485
Cerebellar and labyrinthine influences on single vestibular neurons identified by natural stimuli. H. SHIMAZU AND C. M. SMITH 493
Field potentials in the alligator cerebellum and theory of their relationship to Purkinje cell dendritic spikes. C. NICHOLSON AND R. LLINÁS 509
Electrophysiological properties of dendrites and somata in alligator Purkinje cells. R. LLINÁS AND C. NICHOLSON 532
Relationship of firing patterns of units in face area of monkey precentral cortex to conditioned jaw movements. E. S. LUSCHEI, C. R. GARTHWAITE, AND M. E. ARMSTRONG 552
Effect of chronic disuse of rat soleus neuromuscular junctions on postsynaptic membrane. G. D. FISCHBACH AND N. ROBBINS 562
Effect of chronic disuse of rat soleus neuromuscular junctions on presynaptic function. N. ROBBINS AND G. D. FISCHBACH 570
Homeostasis in retinal receptive fields. L. MAFFEI, A. FIORENTINI, AND L. CERVETTO 579
Processing of visual inputs by brain of *Limulus*. D. M. SNODDERLY, JR. 588
Dynamic characteristics of stretch reflex using force inputs. A. BERTHOZ, W. J. ROBERTS, AND N. P. ROSENTHAL 612
A control model of stretch reflex. W. J. ROBERTS, N. P. ROSENTHAL, AND C. A. TERZUOLO .. 620
Physiology of peripheral neurons innervating semicircular canals of the squirrel monkey. I. Resting discharge and response to constant angular accelerations. J. M. GOLDBERG AND C. FERNÁNDEZ 635
Physiology of peripheral neurons innervating semicircular canals of the squirrel monkey. II. Response to sinusoidal stimulation and dynamics of peripheral vestibular system. C. FERNÁNDEZ AND J. M. GOLDBERG 661
Physiology of peripheral neurons innervating semicircular canals of the squirrel monkey. III. Variations among units in their discharge properties. J. M. GOLDBERG AND C. FERNÁNDEZ 676
Some effects of stimulus intensity on response of auditory nerve fibers in the squirrel monkey. J. E. ROSE, J. E. HIND, D. J. ANDERSON, AND J. F. BRUGGE 685
Intersegmental and intrasegmental distribution of mutual inhibition of Renshaw cells. R. W. RYALL, M. F. PIERCEY, AND C. POLOSA 700
Announcement 708

XUM

NO. 5. SEPTEMBER 1971

Response of brain stem reticular neurons to muscle vibration in the decerebrate cat. O. POMPEIANO AND C. D. BARNES 709
Effect of sinusoidal muscle stretch on neurons in medial and descending vestibular nuclei. O. POMPEIANO AND C. D. BARNES 725
Intracellular redox changes in functioning cerebral cortex. I. Metabolic effects of epileptiform activity. F. F. JÖBSIS, M. O'CONNOR, A. VITALE, AND H. VREMAN 735
Intracellular redox changes in functioning cerebral cortex. II. Effects of direct cortical stimulation. M. ROSENTHAL AND F. F. JÖBSIS 750
Interactions of cortical and retinal projections on single neurons of the cat's superior colliculus. J. T. MCILWAIN AND H. L. FIELDS 763
Origin of nerve impulse in slowly adapting stretch receptor of crayfish. G. L. RINGHAM .. 773
Role of horizontal cells in organization of the catfish retinal receptive field. K.-I. NAKA AND P. W. NYE 785
Effects of auditory cortical lesions on discriminations of rising and falling frequency-modulated tones. J. B. KELLY AND I. C. WHITFIELD 802
Rates of transmitter turnover in the cat superior cervical ganglion estimated by electrophysiological techniques. D. L. MCCANDLESS, B. ZABLOCKA-ESPLIN, AND D. W. ESPLIN 817
Rates of transmitter turnover at the frog neuromuscular junction estimated by electrophysiological techniques. R. ČAPEK, D. W. ESPLIN, AND S. SALEHMOGHADDAM 831
Rates of transmitter turnover in spinal monosynaptic pathway investigated by electrophysiological techniques. D. W. ESPLIN AND B. ZABLOCKA-ESPLIN 842
Persistent changes in transmission in spinal monosynaptic pathway after prolonged tetanization. B. ZABLOCKA-ESPLIN AND D. W. ESPLIN 860
Synaptic processing of taste-quality information in thalamus of the rat. T. R. SCOTT, JR. AND R. P. ERICKSON 868
Electrophysiological evidence for an input to lateral reticular nucleus from collaterals of dorsal spinocerebellar and cuneocerebellar fibers. J. E. BURTON, J. R. BLOEDEL, AND R. S. GREGORY 885
Influence of superior colliculus on cat neck motoneurons. M. E. ANDERSON, M. YOSHIDA, AND V. J. WILSON 898
Absence of a stretch reflex in extraocular muscles of the monkey. E. L. KELLER AND D. A. ROBINSON 908
Discharge characteristics of single units in superior colliculus of the alert rhesus monkey. P. H. SCHILLER AND F. KOERNER 920
Jan-Friedrich Tönnies. J. C. ECCLES 937

NO. 6. NOVEMBER 1971

Functioning of identified neurons and synapses in abdominal ganglion of *Aplysia* in absence of protein synthesis. J. H. SCHWARTZ, V. F. CASTELLUCCI, AND E. R. KANDEL 939
Anatomical and physiological studies on muscles of lamprey. H. TERÄVÄINEN 954
Identification and properties of motoneurons to fin muscle of the sea lamprey. C. M. ROVAINEN AND K. L. BIRNBERGER 974
Behavioral and intracellular studies of a habituating fin reflex in the sea lamprey. K. L. BIRNBERGER AND C. M. ROVAINEN 983
Fast and slow motoneurons to body muscle of the sea lamprey. H. TERÄVÄINEN AND C. M. ROVAINEN 990
Electrical activity of myotomal muscle fibers, motoneurons, and sensory dorsal cells during spinal reflexes in lampreys. H. TERÄVÄINEN AND C. M. ROVAINEN 999
Reciprocal group I inhibition on triceps surae motoneurons in man. Y. MIZUNO, R. TANAKA, AND N. YANAGISAWA 1010
Determinants of body representation in postcentral gyrus of macaques. B. L. WHITSEL, D. A. DREYER, AND J. R. ROPPOLO 1018
Axons of dorsal spinocerebellar tract which respond to activity in cutaneous receptors. M. D. MANN 1035
Adequate stimulus for tendon organs with observations on mechanics of ankle joint. J. C. HOUK, J. J. SINGER, AND E. HENNEMAN 1051
Sympathetic effects on fibrillary activity of denervated striated muscles. C. F. LUCO AND J. V. LUCO 1066
Tension and rate of tension development during isometric responses of extraocular muscle. N. H. BARMACK, C. C. BELL, AND B. G. RENCE 1072
Indexes 1081

Subject Index to Volume XXXIV

Abdominal ganglion
  intersegmental coordination of swimmeret motoneuron activity in crayfish, 310–318
  of *Aplysia*, acetylcholinesterase activity of identified neurons of, 108–115
  of *Aplysia*, choline acetyltransferase activity in identified neurons of, 93–107
  of *Aplysia*, ionic mechanisms of excitatory, inhibitory, and dual synaptic actions mediated by neuron of, 76–92
  of *Aplysia*, neuron and synapse functioning in absence of protein synthesis in, 939–953
  of *Aplysia*, neuron producing both synaptic excitation and inhibition, 56–68
Acceleration
  response of neurons innervating semicircular canals of monkeys, 635–660
Acetylcholine
  effects on excitatory, inhibitory and dual synaptic actions mediated by neuron of *Aplysia* abdominal ganglion, 76–92
  turnover rates in neuromuscular junction of frogs, 831–841
  turnover rates in spinal monosynaptic pathway of cats, 842–859
  turnover rates in superior cervical ganglion of cats, 817–830
Acetylcholinesterase
  in identified neurons of abdominal ganglion of *Aplysia*, 108–115
Adaption, physiological
  light adaptation of each type of retinal cell in *Necturus*, 228–241
  visual adaptation in crayfish, peripheral origin of, 485–492
Alligators
  cerebellar field potentials, relation to Purkinje cell dendritic spikes, 509–531
  dendrites and somata in Purkinje cells, electrophysiological properties, 532–551
Androgens
  effects on olfactory coding in rats, 208–216
Ankle joint
  mechanics in tendon organ studies with cut and uncut tendons, 1051–1065
Auditory nerve
  response to sound pressure level changes in monkeys, 685–699
Axons
  motor units distributed over two adjacent muscles, contraction of myofibrils in, 132–138
  of dorsal spinocerebellar tract, response to cutaneous receptor activity, 1035–1050

Birds
  evaluation of retinal electrical anisotropy in, 367–373
  local electroretinography in, 357–366
Brain
  of *Limulus*, processing of visual inputs, 588–611
Brain stem
  control of tonic vibration reflex in cats, 302–309
  neuronal response to muscle vibration in decerebrate cats, 709–724

Castration
  effect on olfactory coding in olfactory bulb and medial forebrain bundle in male rats, 208–216
  influence on single vestibular neurons in cats, 493–508
Cerebellar cortex
  climbing fiber inputs, effects on Purkinje cell activity in cats, 17–31
  field potentials in alligators, relation to Purkinje cell dendritic spikes, 509–531
  Purkinje cell dendrites and somata in alligators, 532–551
  Purkinje cell response in cats, origin of, 348–356
Cerebellum
  cerebellothalamic pathway activities during wakefulness and synchronized sleep in cats, 389–413
  dorsal spinocerebellar and cuneocerebellar fibers with inputs to lateral reticular nucleus, 885–897
  dorsal spinocerebellar tract axons, response to cutaneous receptor activity, 1035–1050
Cerebral cortex
  auditory cortex lesions, effect on dicriminations of tones in cats, 802–816
  epileptiform activity in, effect on redox level of NAD in cats, 735–749
  inhibitory resetting of fusimotor neurons, 217–227
  intracellular redox changes after direct cortical stimulation, 750–762
  middle suprasylvian gyrus of cats, single-unit responses to moving visual stimuli, 47–55
  motor cortex modulation of baboon flexor and extensor fusimotor neurons, 428–436
  postcentral gyrus of macaques, determinants of body representation in, 1018–1034
  precentral face area in monkey, discharges in relation to jaw movements, 552–561
  prefrontal cortical unit activity and delayed alternation lever-pressing performance in monkeys, 337–347
  sensorimotor cortex in cats, interaction of responses in, 374–388
  unit activity during self-stimulation in rats, 263–273
  visual cortex in squirrels, correlation between potentials and cytoarchitecture, 437–452
  visual cortex projections on neurons of superior colliculus in cats, 763–772
Cerebral palsy
  reciprocal Ia inhibition on triceps surae motoneurons in, 1010–1017
Choline acetyltransferase
  in identified neurons of abdominal ganglion of *Aplysia*, 93–107

XUM

Cochlear nucleus
neuron response to low-frequency tones is cats, phase-locking in, 467–483
Conditioning
conditioned jaw movements in monkeys, relation to firing of units in precentral face area of cortex, 552-561
Convulsions
activity in cerebral cortex, effect on redox level of NAD in cats, 735–749
Crustacea
crayfish, impulse origin in slowly adapting stretch receptor of, 773–784
crayfish swimmeret motoneuron activity, intersegmental coordination of, 310–318
Limulus, processing of visual inputs by brain of, 588–611
lobster swimmeret system, functional, significance of motoneuron size in, 274–288
matching of excitatory and inhibitory inputs to muscle fibers of, 157–170
visual adaptation in, peripheral versus central origin, 485–492

Dendrites
of Purkinje cells in alligator cerebellum, electrophysiological properties, 532–551
of Purkinje cells in alligator cerebellum, potential analysis, 509–531
Diaphragm
prejunctional effect of curare, 289–301

Electric potentials: *see also* End-plate potentials
evoked visual cortical potentials in squirrels, correlation with cytoarchitecture, 437–452
excitatory and inhibitory postsynaptic, analysis of parallel channels, 69–75
excitatory and inhibitory postsynaptic, ionic mechanisms of, 76–92
excitatory and inhibitory postsynaptic, mediation by neuron in *Aplysia* abdominal ganglion, 56–68
excitatory postsynaptic, in motoneurons of single Ia myofibrils, 171–187
fibrillary potentials of denervated skeletal muscles, sympathetic effects on, 1066–1071
field potentials evoked by electric stimulation of alligator cerebellum, 509–531
of dendrites and somata in alligator Purkinje cells, 532–551
synaptic potentials in fin motoneurons of lamprey, 983–989
Electric stimulation
isometric responses of oculomotor muscles, tension and rate of tension development during, 1072–1079
matching of excitatory and inhibitory inputs to crustacean muscle fibers, 157–170
of cerebral cortex causing intracellular redox changes, 750–762
of reticular formation facilitating tonic vibration reflex of triceps surae of cats, 302–309
of superior colliculus, influence on cat neck motoneurons, 898–907
prolonged tetanization of spinal monosynaptic pathway in cats causing persistent changes in transmission, 860–867
sinusoidal stimulation of peripheral neurons innervating semicircular canals in monkeys, 661–675
Electrophysiology
of lamprey muscles, 954–973
Electroretinography
diffuse and local, in birds, 357–366
End-plate potentials
effect of curare on phrenic nerve-diaphragm preparation, 289–301
effects of procaine and lidocaine on, comparative experiments, 32–46
in chronically disused soleus neuromuscular junctions in rats, 570–578
Excitatory postsynaptic potentials: *see* Electric potentials
External cuneate nucleus
input to lateral reticular nucleus from, 885–897
Extraocular muscles: *see* Oculomotor muscles
Eye movement
relation to discharges of single units in superior colliculus of alert rhesus monkeys, 920–935

Fish: *see also* Lampreys
catfish retinal receptive field, role of horizontal cells in organization of, 785–801
Fluorometry
measurement of intracellular redox changes in cerebral cortex after direct cortical stimulation, 750–762
measurement of seizure-related changes in redox level of NAD in cerebral cortex of cat, 735–749

Gastrocnemius muscle: *see also* Medial gastrocnemius muscle
stretch reflex model, contributions of mechanical and reflex components, 620–634
stretch reflex using force inputs, dynamics in cats, 612–619
Gastrocnemius-soleus muscle
vibration of, effect on neurons in medial and descending vestibular nuclei, 725–734
vibration of, response of reticular formation in decerebrate cats, 709–724
Geniculate bodies
lateral geniculate neurons, receptive-field characteristics in rabbits, 139–147
lateral geniculate nuclei in cats, nasotemporal overlap in visual field projected to, 453–466
Globus pallidus
neuronal activity during limb movements in monkeys, 414–427

Hearing
tone discrimination, effects of auditory cortical lesions in cats, 802–816
Hippocampus
unit activity during self-stimulation in rats, 262–273
Homeostasis
in retinal receptive fields in cats, 579–587
Hypothalamus
preoptic area responses to various odors in normal and castrated male rats, 208–216

unit activity during self-stimulation in rats, 263–273

Inhibitory postsynaptic potentials: *see* Electric potentials
Ions
effects on excitatory, inhibitory, and dual synaptic actions mediated by neuron of *Aplysia* abdominal ganglion, 76–92

Labyrinth
influence on single vestibular neurons in cats, 493–508
Lampreys
anatomy and physiology of muscles of, 954–973
fast and slow motoneurons to body muscle of, 990–998
habituating fin reflex in, behavioral and intracellular studies of, 983–989
motoneurons to fin muscle of, identification and properties, 974–982
spinal reflexes in, electrical activity of myofibrils, motoneurons, and dorsal cells during, 999–1009
Lateral reticular nucleus
inputs from collaterals of dorsal spinocerebellar and cuneocerebellar fibers to, 885–897
Lidocaine
effect on end-plate potentials, comparison with procaine, 32–46
Light
adaptation of each type of retinal cell in *Necturus* to various levels of, 228–241
stimulation of retina in cats, homeostasis in receptive fields, 579–587

Mandible
conditioned movements in monkeys, relation to firing of units in precentral face area of cortex, 552–561
Medial forebrain bundle
responses to various odors in normal and castrated male rats, 208–216
Medial gastrocnemius muscle
Ia, fibers from, location, density, and distribution of terminals of, 171–187
motor units, effect of prior activity on properties of, 1–16
Models
of stretch reflex, contributions of mechanical and reflex components, 620–634
Mollusca
Aplysia, acetylcholinesterase in identified neurons of abdominal ganglion of, 108–115
Aplysia, choline acetyltransferase in identified neurons of abdominal ganglion of, 93–107
Aplysia, firing patterns in pleural ganglion neurons of, 321–336
Aplysia, functioning of abdominal ganglion neurons and synapses in absence of protein synthesis, 939–953
Aplysia, ionic mechanisms of excitatory, inhibitory, and dual synaptic actions mediated by neuron in abdominal ganglion of, 76–92
Aplysia, neuron producing both synaptic excitation and inhibition, 56–68
Aplysia, parallel excitatory and inhibitory synaptic channels in single neuron of, 69–75
Motoneurons
distribution of terminals of single Ia myofibrils within pool of, 171–187
electrical activity in lampreys during spinal reflexes, 999–1009
fast and slow, to body muscle of lamprey, 990–998
of cat neck, influence of stimulation of superior colliculus on, 898–907
of crayfish swimmeret, intersegmental coordination, 310–318
size and soma position in swimmeret system of lobster, 274–288
to fin muscle of lamprey, identification and properties of, 974–982
to triceps surae, reciprocal Ia inhibition on, 1010–1017
Motor units
of skeletal muscles, effect of prior activity on properties of, 1–16
Movement
activity of globus pallidus neurons in monkeys during, 414–427
rotation activating vestibular neurons, cerebellar and labyrinthine influences on, 493–508
Muscle contraction
in two adjacent muscles innervated by branches of same motor axon, 132–138
isometric responses of oculomotor muscles, tension and rate of tension development during, 1072–1079
Muscles
denervated skeletal muscles, sympathetic effects on fibrillation of, 1066–1071
fast and slow motoneurons to body muscle of lamprey, 990–998
motor units, effect of prior activity on properties of, 1–16
myotomal muscle fibers in lampreys, electrical activity during spinal reflexes, 999–1009
of fin of lamprey, motoneurons to, 974–982
of lamprey, anatomy and physiology, 954–973
swimmeret muscles of lobster, motoneuron size and soma position in, 274–288
tendon organ responses and thresholds to passive stretch in, 1051–1065
Myofibrils
contraction in two adjacent muscles innervated by branches of same motor axon, 132–138
matching of excitatory and inhibitory inputs in Crustacea, 157–170
of lamprey myotomes, electrical activity during spinal reflexes, 999–1009
single Ia fibers, location, density and distribution, 171–187

Neck
motoneurons in cat, influence of stimulation of superior colliculus on, 898–907
Neural transmission
in spinal monosynaptic pathway of cats, persistent changes after prolonged tetanization, 860–867
transmitter turnover rates in cat superior cervical ganglion, 817–830

XUM

transmitter turnover rates in frog neuromuscular junction, 831–841
transmitter turnover rates in spinal monosynaptic pathway of cats, 842–859
Neuromuscular junction
of soleus muscle in rat, effect of chronic disuse on postsynaptic membrane, 562–569
of soleus muscle in rat, effect of chronic disuse on presynaptic function, 570–578
transmitter turnover in frogs, rate estimation, 831–841
Neurons: *see also* Motoneurons
flexor and extensor fusimotor neurons in baboons, modulation by motor cortex, 428–436
fusimotor neurons, inhibitory resetting of resting discharge of, 217–227
of *Aplysia* abdominal ganglion, acetylcholinestrase activity in, 108–115
of *Aplysia* abdominal ganglion, choline acetyltransferase activity in, 93–107
of *Aplysia* abdominal ganglion, functioning in absence of protein synthesis, 939–953
of *Aplysia* abdominal ganglion, ionic mechanisms of excitatory, inhibitory, and dual synaptic actions meditated by, 76–92
of *Aplysia* abdominal ganglion, parallel excitatory and inhibitory channels, analysis, 69–75
of *Aplysia* abdominal ganglion producing both synaptic excitation and inhibition, 56–68
of *Aplysia* pleural ganglion, firing patterns of, 321–336
of cochlear nuclear complex, phase-locking in response to low-frequency tones, 467–483
of globus pallidus, activity during limb movements in monkeys, 414–427
of lateral geniculate nucleus, receptive-field characteristics in rabbits, 139–147
of postcentral gyrus of macaques, receptive-field determinations, 1018–1034
of reticular formation, response to muscle vibration in decerebrate cats, 709–724
of semicircular canals in monkeys, response to sinusoidal stimulation and dynamics of peripheral vestibular apparatus, 661–675
of semicircular canals in monkeys, resting discharge and response to angular accelerations, 635–660
of semicircular canals in monkeys, variations in discharge properties, 676–684
of sensorimotor cortex in cats, interaction of responses, 374–388
of slowly adapting stretch receptor in crayfish, 773–784
of superior colliculus, interactions of cortical and retinal projections on, 763–772
of superior colliculus, receptive-field characteristics in rabbits, 148–156
of vestibular nuclei, cerebellar and labyrinthine influences on, 493–508
of vestibular nuclei, responses to muscle vibration in decerebrate cats, 725–734
sensory dorsal cells, electrical activity during spinal reflexes in lampreys, 999–1009
unmyelinated fiber mechanoreceptors, dynamic properties of, 116–131
Nicotinamide-adenine dinucleotide
redox level in cerebral cortex, effect of epileptiform activity in cats, 735–749
Nucleus parabrachialis medialis
respiratory synchronizing function of, 189–207

Obituary
of Jan-Friedrich Tönnies, 937
Oculomotor muscles
absence of stretch reflex in monkeys in, 908–919
isometric responses of, tension and rate of tension development during, 1072–1079
Odors
responses of olfactory bulb and medial forebrain bundle in male rats to, 208–216
Olfactory bulb
responses to various odors in normal and castrated male rats, 208–216
Olivary nucleus
conditioning stimulus of, effect on response of Purkinje cells, 17–31
Optic ganglia
in *Limulus*, responses to visual inputs, 588–611
Oxidation-reduction
intracellular changes in cerebral cortex after convulsive activity in cats, 735–749
intracellular changes in cerebral cortex after direct cortical stimulation, 750–762

Peripheral nerves
afferent fiber stimulation, effect on Renshaw cells, 242–251
Phrenic nerve
prejunctional effect of curare, 289–301
Pleural ganglion
of *Aplysia*, plasticity of firing patterns in neurons of, 321–336
Pons
nucleus parabrachialis medialis, respiratory synchronizing function of, 189–207
Procaine
effect on end-plate potentials, comparison with lidocaine and its derivatives, 32–46
Protein synthesis
inhibition of, effect on functioning of abdominal ganglion neurons and synapses in *Aplysia*, 939–953
Purkinje cells
dendrites and somata in alligators, electrophysiological properties, 532–551
dendritic spikes, relation to field potentials in alligator cerebellum, 509–531
firing of, effects of climbing fiber input on, 17–31
origin of responses in cerebellum of cats, 348–356

Receptors, neural
cutaneous activity, response of axons of dorsal spinocerebellar tract to, 1035–1050
mechanoreceptors with unmyelinated fibers, dynamic properties of, 116–131
stretch receptor of crayfish, impulse origin during slow adaptation of, 773–784
tendon organs, responses and thresholds to passive stretch, 1051–1065
Reflex
habituating fin reflex in lamprey, 983–989

spinal reflexes in lampreys, electrical activity of myofibrils, motoneurons, and dorsal cells during, 999–1009
stretch reflex, absence in oculomotor muscles of monkey, 908–919
stretch reflex, control model of, 620–634
stretch reflex in gastrocnemius muscle using force inputs, dynamics in cats, 612–619
tonic vibration reflex of triceps surae in cats, 252–262
tonic vibration reflex of triceps surae in cats, supraspinal control of, 302–309
Renshaw cells
excitation and inhibition by impulses in peripheral afferent nerve fibers, 242–251
intersegmental and intrasegmental distribution of mutual inhibition of, 700–707
Respiration
synchronizing function of nucleus parabrachialis medialis, 189–207
Reticular formation
electric stimulation facilitating tonic vibration reflex of triceps surae of cats, 302–309
neuronal response to muscle vibration in decerebrate cats, 709–724
Retina
electrical anisotropy in birds, evaluation of, 367–373
lateral geniculate neuron responses in rabbits to stimulation of, 139–147
light adaptation of each type of cell in *Necturus*, 228–241
microelectrode studies of ERG in birds, 357–366
nasotemporal overlap in visual field projected to lateral geniculate nuclei in cats, 453–466
projection on neurons of superior colliculus in cats, 763–772
receptive-field characteristics in relation to discharges of superior colliculus in alert rhesus monkeys, 920–935
receptive-field organization in catfish, role of horizontal cells, 785–801
receptive fields of, homeostasis in cats, 579–587
superior colliculus neuron response in rabbits to stimulation of, 148–156

Salamanders
Necturus, light adaptation of each type of retinal cell in, 228–241
Self-stimulation
unit activity in brain areas of rats during, 263–273
Semicircular canals
neuronal response to sinusoidal stimulation and dynamics of peripheral vestibular apparatus in monkeys, 661–675
neuronal resting discharge and response to angular acceleration in monkeys, 635–660
neuronal variations in discharge properties in monkeys, 676–684
Skin
receptor activity, response of axons of dorsal spinocerebellar tract to, 1035–1050
Sleep
cerebellothalamic pathway activities in cats, during, 389–413
Smell
olfactory coding in olfactory bulb and medial forebrain bundle of normal and castrated male rats, 208–216
Soleus muscle
chronic disuse in rats, effect on postsynaptic membrane, 562–569
chronic disuse in rats, effect on presynaptic function, 570–578
motor units, effect of prior activity on properties of, 1–16
Sound
low-frequency stimulation of cochlear nucleus neurons, phase-locking in response of, 467–483
pressure level changes, effects on auditory nerve fibers in monkeys, 685–699
rising and falling frequency-modulated tones, discrimination in cats, 802–816
Spinal cord
dorsal spinocerebellar fibers with inputs to lateral reticular nucleus, 885–897
dorsal spinocerebellar tract axons, response to cutaneous receptor activity, 1035–1050
monosynaptic pathway, persistent changes in transmission after prolonged tetanization, 860–867
monosynaptic pathway, transmitter turnover rates in cats, 842–859
reflexes in lampreys, electrical activity of myofibrils, motoneurons, and dorsal cells during, 999–1009
Spinal nerves
intersegmental and intrasegmental distribution of mutual inhibition of Renshaw cells, 700–707
Stretch
of gastrocnemius-soleus muscle of decerebrated cats, effect on neurons in vestibular nuclei, 725–734
passive, tendon organ responses and thresholds to, 1051–1065
reflex, absence in oculomotor muscles of monkey, 908–919
reflex, control model of and contributions of mechanical and reflex components, 620–634
reflex in gastrocnemius muscle using force inputs, dynamics in cats, 612–619
Superior cervical ganglion
transmitter turnover in cats, rate estimation, 817–830
Superior colliculus
discharge of single units in alert rhesus monkeys, 920–935
influence on cat neck motoneurons, 898–907
neurons of, interactions of cortical and retinal projections on, 763–772
neurons of, receptive-field characteristics in rabbits, 148–156
Sympathetic nervous system
stimulation of, effects on fibrillation of denervated skeletal muscles, 1066–1071
Sympathomimetic drugs
effects on fibrillation of denervated skeletal muscles, 1066–1071
Synapses
excitatory, inhibitory, and dual synaptic actions

XUM

mediated by neuron of *Aplysia* abdominal ganglion, ionic mechanisms, 76–92
excitatory potentials and inhibitory potentials produced by same neuron in *Aplysia* abdominal ganglion, 56–68
of *Aplysia* abdominal ganglion, functioning in absence of protein synthesis, 939–953
parallel excitatory and inhibitory channels in single neuron of *Aplysia* abdominal ganglion, analysis of, 69–75
postsynaptic effects of chronic disuse of soleus neuromuscular junctions in rats, 562–569
presynaptic effects of chronic disuse of soleus neuromuscular junctions in rats, 570–578
spinal monosynaptic pathway in cats, persistent changes in transmission after prolonged tetanization, 860–867
spinal monosynaptic pathway in cats, transmitter turnover rates in, 842–859
synaptic processing of taste-quality information in rat thalamus, 868–884
Task performance
correlation with prefrontal cortical unit activity in monkeys, 337–347
Taste
thalamic mechanisms in rats, 868–884
Tendons
tendon organs, responses and thresholds to passive stretch, 1051–1065
Thalamus
cerebellothalamic pathway activities during wakefulness and synchronized sleep in cats, 389–413
synaptic processing of taste-quality information in, 868–884
Triceps surae muscle
reciprocal Ia inhibition on motoneurons of, 1010–1017
tonic vibration reflex in cats, 252–262
tonic vibration reflex in cats, supraspinal control of, 302–309
Ventrolateral thalamic nucleus
activity during wakefulness and synchronized sleep in cats, 389–413
Vestibular apparatus
dynamics in squirrel monkeys, 661–675
Vestibular nerve
neuronal resting discharge and response to accelerations in monkeys, 635–660
neuronal variations in discharge properties in semicircular canals of monkeys, 676–684
Vestibular nuclei
medial and descending, neuronal responses to muscle vibration in decerebrate cats, 725–734
single neurons of, cerebellar and labyrinthine influences on, 493–508
Vibration
of muscles in decerebrate cats, effect on neurons in medial and descending vestibular nuclei, 725–734
of muscles in decerebrate cats, response of reticular formation neurons to, 709–724
tonic vibration reflex of triceps surae in cats, 252–262
tonic vibration reflex of triceps surae of cats, supraspinal control of, 302–309
Visual fields
nasotemporal overlap, projection to lateral geniculate nuclei in cats, 453–466
Visual stimuli
processing by brain of *Limulus*, 588–611
response of units in superior colliculus of alert rhesus monkeys, 920–935
responses of lateral geniculate neurons in rabbits to, 139–147
responses of single units in suprasylvian gyrus of cats to, 47–55
responses of superior colliculus neurons in cats to, 763–772
responses of superior colliculus neurons in rabbits to, 148–156
